QUILTING

Our quilt kits use one or multiple tapestry/cross stitch images with a piece quilt frame.

Exact designs depend upon the size and dimensions of the chosen canvas.

Currently, we have designs for Cushions, Baby quilts, and Single/Double bed quilts. (With negotiation, we can also create Queen and King size quilt designs as well).
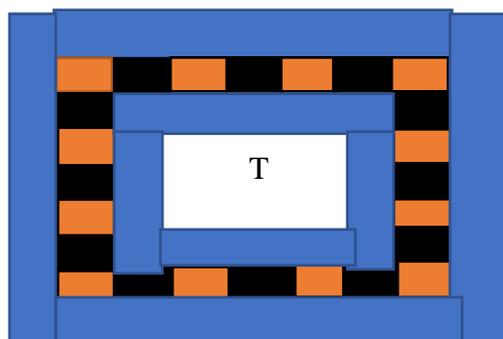

All kits come with canvas with either wool or cotton and a tapestry needle, pre-cut fabric and backing fabric. You will need to acquire wadding, sewing cotton, and have scissors, an iron, and either a sewing machine or needle (if you wish to sew by hand).

We are happy to create kits for you, but one of our uniqueness, other than our cards, is that we try not to recreate items exactly, so your crafted item is somewhat unique rather than mass reproduced. So, since there are so many lovely styles and colours of fabric, creating kits consists of so many varieties, we cannot list them all.

So if you'd like us to create one of our kits for you, please fill out the order form: but be aware that we cannot show you the exact fabric and colour that will be chosen before-hand, though if you wish, we can email you an image of the chosen fabrics. *If you are totally unhappy with the choice, we are happy to refund the cost of the kit once it has been returned <u>unopened</u>, except for the P&H costs.*

Cushions

Our cushions use a small/medium sized canvas and are usually around 45 cm x 45 cm in size. Variations of canvas size and dimensions will change the pattern slightly, but most cushion designs will look like:

Baby Quilts

Our baby quilts should fit most standard sized cots. If you know the size of your cot and its dimensions are larger or smaller than our size of 95 cm x 70 cm, then please adjust accordingly. Variations of canvas size and dimensions will change the pattern slightly, but most baby quilt designs will look like:

Single Image   Six Panel Image

Single/Double Bed Quilts

For the single image quilts, most will be a similar design to the baby quilts, but with added squares and boarders, depending upon canvas size.
